VENZO_cyber security

Emergency Response Service

For when you need the best to be on your team.

Key Benefits

Limit impact and costs for your organization with structured emergency response

Structured event handling by experienced Incident Manager

Trained Security Analysts assist with incident response

Microsoft driven toolkit to help detect and eradicate threats in your environment

Proactive assistance from detection to eradication of threats, using industry best practice

Did you know?

Dealing with a severe cyber security incident is a challenge for organizations of all sizes and industries.

We are here to help you

We perform when we deep-dive into various data sources, whether they are network logs in MS Sentinel SIEM or process activity data in MS Defender ATP.

Experienced Analysts

With a team of experienced security analysts, **VENZO_** offers the know-how to handle large scale security incidents to help you identify and eradicate threat actors from your environment.

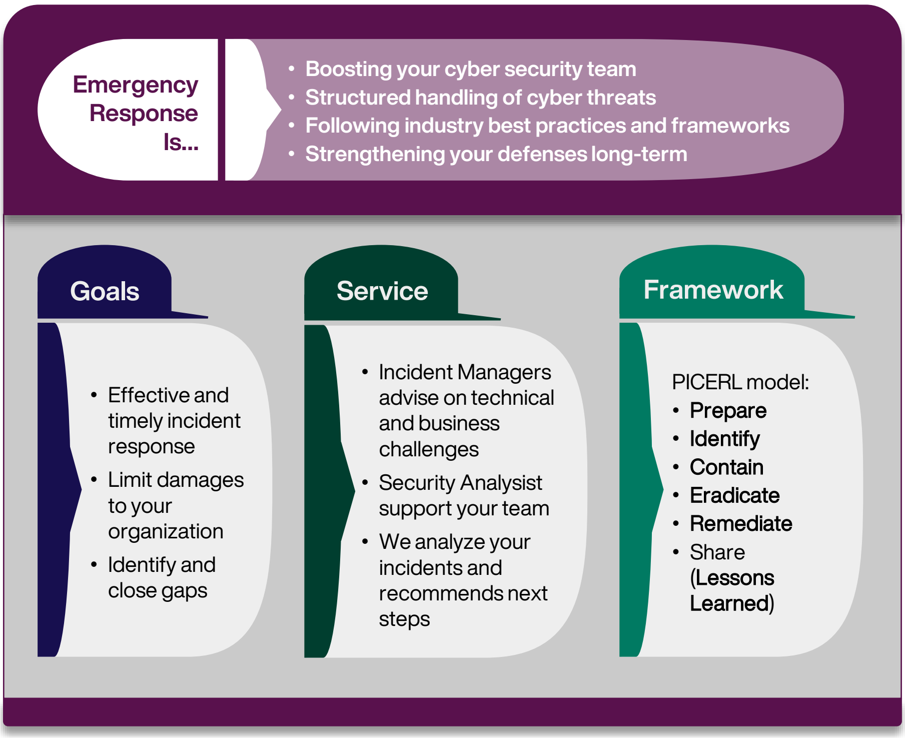
> *"70% of attacks impacting EMEA in 2019 were financially motivated with 87% of threat actors being external to the impacted organization."*
>
> - Verizon 2020 Data Breach Investigations Report

As modern attack techniques evolve, traditional security solutions become unable to detect them. Even with more sophisticated products, it is challenging to keep attackers outside of your environment and protect your most important assets.

What would have been a harmless incident might have evolved into an emergency by the time your team discovers a threat.

When your team needs a boost, **VENZO_** cyber security is ready to jump in. With our Emergency Response Service, we help you detect, contain and expel unwanted visitors from your environment and assist with coordinating response activities within your organization.

What is an Emergency Response Service?



Emergency Response Is...

- **Boosting your cyber security team**
- **Structured handling of cyber threats**
- **Following industry best practices and frameworks**
- **Strengthening your defenses long-term**
